

Intel Unite® Solution Improves Access for Anaheim Union High School District

Like other educational institutions, the Anaheim Union High School District (Anaheim UHSD) experiences connection hassles, lost productivity, and classroom delays when trying to connect display systems and devices in classrooms and meeting spaces. Anaheim UHSD sought an affordable solution that would enable easy-to-use, reliable content. Anaheim UHSD chose the Intel Unite® solution as the simplest, cost-effective, and robust option for seamless connectivity and real-time collaboration. Anaheim UHSD installed Intel® Core™ vPro™ processor-based computers enabled with the Intel Unite solution. They now can stream content and manage the exchange of information from the classroom, without the need to manage multiple cable connection options.

“The Intel Unite® solution is the best comprehensive solution for streaming and enabling student access to information. It seamlessly brings together a variety of platforms.”

Erik Greenwood, Chief Technology Officer, Anaheim UHSD
