

At New York's Montefiore Hospital, AI is Helping Doctors Diagnose Earlier and Improve Outcomes

As the academic medical center and University Hospital for Albert Einstein College of Medicine, Montefiore Medical Center is nationally recognized for clinical excellence—breaking new ground in research, training the next generation of healthcare leaders, and delivering science-driven, patient-centered care. Montefiore is working with Intel at the intersection of medicine, technical advancement and innovation, using AI to help create positive outcomes for patients. By creating a digital representation of patients from data and devices in their systems, patients own narratives and through digital devices and remote sensing at home, Montefiore is building a patient-centered analytic learning machine system to develop a better holistic understanding of patients.
